

BLADE'S PORTFOLIO WEBSITE

Slide deck listing the design process and challenges

HOME PAGE

- Using art and logos created by myself and a personal favourite colour of purple I decided on the theme of the website.
- I had troubles making the navigation buttons stand out but think I ended up with an acceptable solution

ABOUT ME

- The goal was to provide a short story to engage the reader about my journey.
- Challenges faced on this particular page was dealing with different flex boxes and having all the elements spaced properly
- Having done a good wireframe with Figma helped the overall design

Traveller, Programmer, Gamer,

Meet Blade, a passionate traveller, programmer, and gamer who has combined his love for technology with his love for adventure. Blade was born and raised in a Australia moving from around with his parents, during this time he developed an early fascination with computers and technology. He spent hours tinkering with computers, learning how to code and exploring the vast universes that gaming had to offer at the time.

Thailand, 2009

Great Wall of China, 2014

After graduating highschool and completing his first year of University, Blade decided to follow his dream of travelling the world. He started out by securing a work placement with a company in Chengdu, China. Immersing himself in different cultures and exploring new cities. Along the way, he continued to work as a Graphic Designer and started learning mandarin during his stay.

As Blade travelled, he was always able to stay connected to friends and family through gaming. He loved the way games could transport him to different worlds and challenge him to solve complex problems. He began to integrate gaming into his travels, seeking out local gaming communities and participating in online competitions.

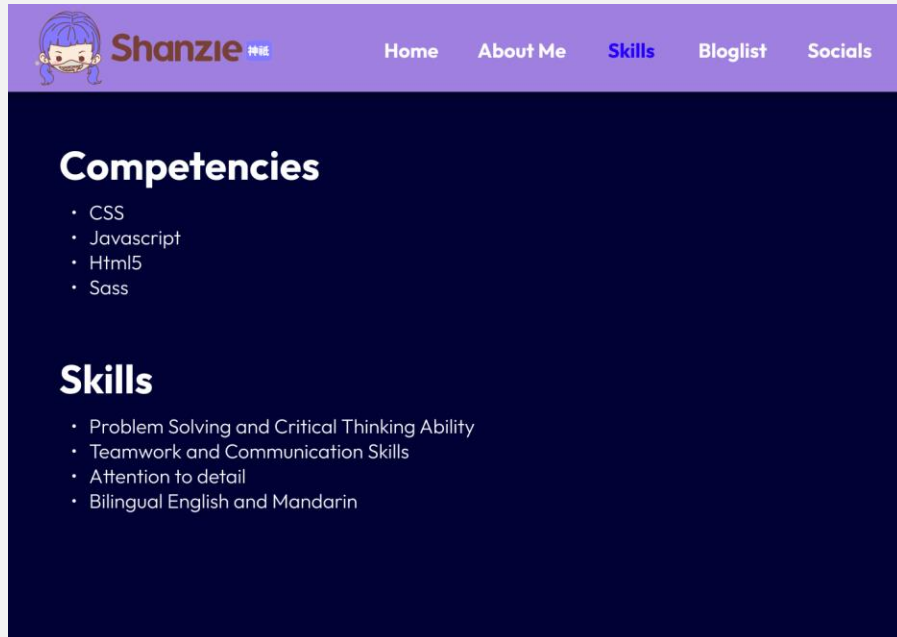

World of Warcraft Classic, 2018

Chengdu, China, 2019

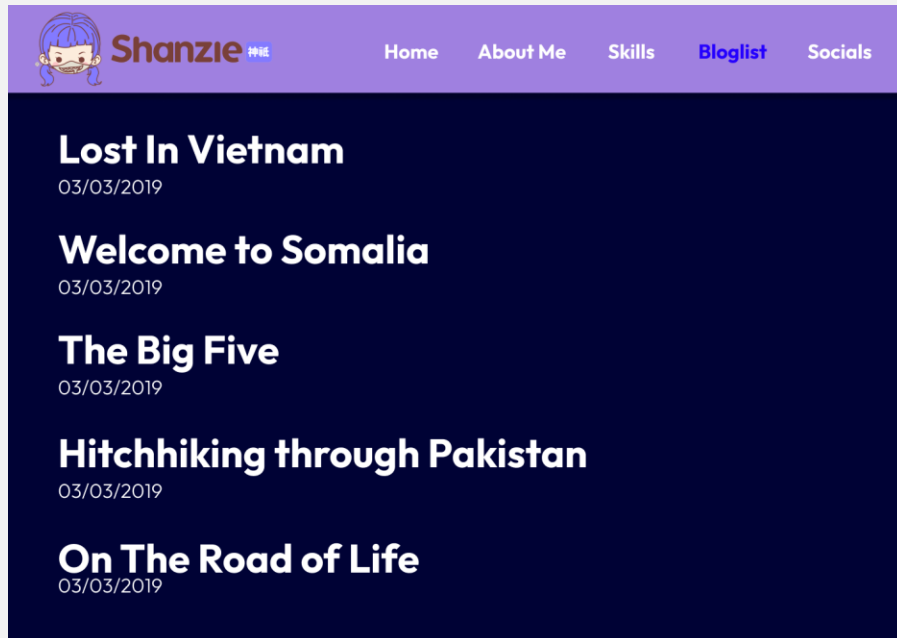

Today Blade is currently in pursuit of becoming a successful digital nomad, with goals to move overseas again travelling the world with his laptop and exploring new destinations while continuing to code and game. He has worked on projects for clients all over the world, and has built a reputation as a skilled programmer. When he's not working or gaming, you can find him planning for his next getaway.

SKILLS PAGE

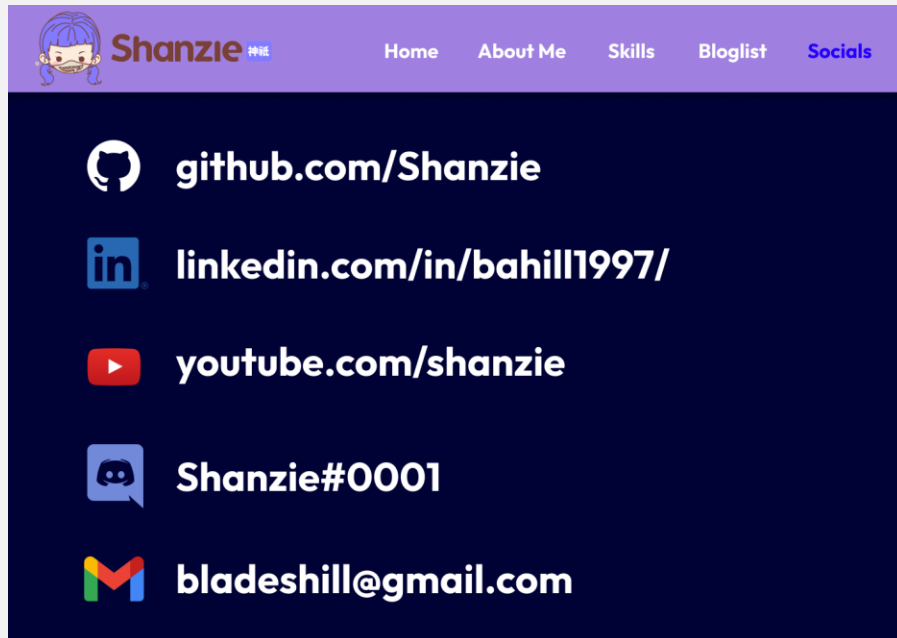

- Simple page to list competencies and skills for the targeted employer
- Possible to also link certificates and more at a later date

BLOGLIST

- Didn't fully understand the scope of this page but tried my best to incorporate it into the final website.

SOCIALS

- Final page listing all social links for the employer to branch out further if they have liked what they have seen
- Overall the website challenge was enjoyable with a few hiccups on the way and a few dropped features due to time constraints.
